
JavaScript Developer (f/m/d)

Your Position

We are looking for a motivated and independently working software developer to strengthen our agile development team. Your preferred programming language is JavaScript, you are not afraid of challenges and you support us with innovative ideas wherever you can. You like to be part of a young and agile development team and work in a growing start-up with flat hierarchies and short decision paths. Does that sound exciting to you? Then send us your application and work with us to further develop our product.

What we offer you

Basics:

- An attractive mix of salary, holidays and benefits
- Personal and professional development and further training
- An innovative product - realized with a modern software stack and state-of-the-art web technologies
- An interesting, challenging and varied job
- A young, friendly and competent team of developers
- Excellent technical equipment
- Flat hierarchies, short decision paths and opportunities for co-designing

Additional services / options to be negotiated individually:

- Home office
- 4-day week
- Flexible working hours
- Special leave
- Occupational pension provision
- Apple equipment (notebook, telephone) with the option of private use

Your Profile

- Very good expertise in JavaScript, as well as experience with complex web applications
- A good understanding of modern JavaScript best practices
- Experience with React, Redux and NodeJS
- Not absolutely necessary, but onboarding would be a bit easier if you have gained experience with it:
 - MongoDB, Webpack, Jenkins, AWS
 - Agile development methods
- Very good communication skills, passion for modern technologies and a structured and independent way of working.
- A completed degree in computer science, programming experience or a comparable qualification

Application

Send us your application or a link to your Xing or LinkedIn profile with your salary expectations to the following e-mail address: jobs@weframe.com.
