

Front-end Developer (f/m/d)

Planegg / Munich

Your Position

We are looking for a motivated and independently working software developer to strengthen our agile development team. Your preferred programming language is JavaScript, you are not afraid of challenges and you support us with innovative ideas wherever you can. You like to be part of a young and agile development team and work in a growing start-up with flat hierarchies and short decision paths. Does that sound exciting to you? Then send us your application and work with us to further develop our product.

Your Profile

- Very good expertise in JavaScript, as well as experience with complex web applications
- A good understanding of best practices in modern JavaScript
- Experience with React, Redux, and NodeJS as well as with software tests
- Passion for modern technologies and Clean Code
- Very good communication skills
- Structured and independent workstyle
- A completed degree in computer science, programming experience or a comparable qualification

Nice to have:

- Experience with Webpack, Jenkins, AWS, and agile development methods

What we offer you

- An attractive mix of salary, holidays and benefits
- Personal and professional development and further training
- An innovative product - realized with a modern software stack and state-of-the-art web technologies
- An interesting, challenging and varied job
- A young, friendly and competent team of developers
- Excellent technical equipment
- Flat hierarchies, short decision paths and opportunities for co-designing

To be negotiated individually:

- Home office
- 4-day week
- Flexible working hours
- Special leave
- Occupational pension provision
- Apple equipment (notebook, telephone) with the option of private use

Application

Send us your application or a link to your Xing or LinkedIn profile with your salary expectations to the following e-mail address: jobs@weframe.com.

We look forward to hearing from you!
